*Certain measures are being taken to prevent the coronavirus from spreading. Here you will find the answer to all frequently asked questions on the matter. These questions are very frequently updated.*

*Would you like to visit the city counter?*

*If so, be sure to read the information under the topic ‘Counters’ before taking any further steps.*

Follow the basic rules

Follow the basic rules

- Everyone over 12 years old must always carry a face mask with them. Wearing a face mask is mandatory in publicly accessible buildings (e.g. libraries, museums, city locations, cinemas, etc.) on public transport, in shops and in places where you cannot keep a distance of 1.5 meters from each other, for example at markets and in recycling parks.

- Hygiene rules remain essential:
  - Wash your hands often.
  - Use a new paper tissue each time and throw it away in a closed trash can. If you do not have one at hand, cough or sneeze in the inside of your elbow.
  - Do not give hands, kisses or hugs.
  - Have as little contact with others as possible. Stay at home if you are ill (and in that case call a doctor).

- As a rule, everyone should maintain a safety distance of at least 1.5 metres - the so-called **social distance** - from each other.
  - This rule does not apply in your own household and among children under 12 years of age.
  - In addition, each household may meet a maximum of 5 people, always the same ones. This is your social bubble. Children under the age of 12 are not included among these 5 people. Also youu company at the
table in restaurants and bars is limited to your household and/or your social bubble.
  o When you meet outside your home with people who do not belong to your household, you can do so with a maximum of 10 people, including yourself. In this case you need to always keep a distance of 1,5 m.

● Outdoor activities should be preferred wherever possible. Where necessary, rooms should be adequately ventilated.
● Additional precautions must be taken for people belonging to a high-risk group. Pay special attention to those who are more sensitive to the virus:
  o people over 65 years old
  o people with diabetes or with heart, lung or kidney problems
  o people who are more prone to infections.
● In public and in publicly accessible establishments, the use by several people of the same can, glass, bottle, etc. for food and drink consumption is prohibited, as is the use of the same item of smoking material (cigarette, e-cigarette, etc.) by several people. The use of hookahs is completely prohibited in public and in publicly accessible establishments.
● In certain establishments the visitors’ data (mobile phone or e-mail address) of is temporarily stored:
  o cafés and restaurants
  o pools
  o wellness centres
  o amusement arcades
  o group sports lessons
  o reception halls

These data may only be used for COVID-19 purposes and will be destroyed after the set deadline.

**Testing village 'TestCovid'
**

Q: Who can get tested in the testing village?

The testing village is meant for people without disease symptoms. Those who do have symptoms should contact their general practitioner.

The village is not freely accessible, but **by appointment only** and for those who meet the following four criteria:
2. You live in 1 of the 9 districts of the city of Antwerp, or in the communes Borsbeek, Schoten, Stabroek or Wommelgem.
3. You meet one of these test conditions:
• You have received an activation code/PCR code (molecular test) from the government. This code can be obtained via a contact researcher or automatically after returning from a red area abroad upon completing the mandatory electronic travel form, the so-called "Public Health Passenger Form".
• If you come back from an amber zone abroad you are strongly advised, not obliged, to get tested. You must bring your 'Passenger Locator Form', otherwise you cannot get tested.
• If your doctor has issued an electronic prescription.
• If you want to get tested before going on a trip abroad (for work or holidays).
• If you want to get tested a second time after you were obliged to stay in quarantine.

4. You have registered on www.testcovid.be. On this website you must register and enter the activation code or PCR code that you have received (only necessary if you are returning from a red zone) and answer a number of questions. Those who qualify can then make an appointment for the test village, up to two days in the future.

**Q: What should I bring along to the testing village?**
After making an appointment, you will receive an e-ticket with a QR-code. This code, together with proof of identity, gives access to the test village.
Are you returning from an **amber zone**? Take your e-ticket and your Passenger Locator Form and identity card with you as proof!

Wear a face mask if you are getting tested and keep a distance of 1.5 metres from other people waiting.

**Q: What if I haven't received an activation code / a PCR code?**

A: If you have not received a text message yet, please consult your doctor. He or she can assess whether a test is necessary and prescribe one. Do you have other questions about receiving an activation code/a PCR code? Please contact us via info-coronavirus.be/en/contact/.

**Q: I need to be quarantined. Can I get tested more than once?**
If you have to go into mandatory quarantine, you are allowed to get tested a second time (free of charge) in the testing village. This way you can shorten your quarantine by four to five days.
More precisely, this applies to those who show no symptoms and have had a **first negative test less than seven days** after a high-risk contact or after returning from a trip.

- Those who show no symptoms and have to be quarantined will receive an invitation to the testing village for a second test 5 days after their first negative test. This is free of charge.
- The second test can be taken at the earliest nine days after the high-risk contact or after the return date.
- Is the second test negative? If so, the quarantine can be stopped earlier than the planned 2 weeks.

**Q: Is the test free of charge?**

Yes, except if you are getting tested because you need a certificate for a trip abroad. Several countries require foreigners to have a certificate of a recent negative test, or a mandatory post-arrival quarantine. If you are planning a trip abroad you can get tested beforehand in the testing village. This test costs 46.81 euros per person and is not reimbursed by the RIZIV (National Institute for Disease and Invalidity Insurance).

After the online reservation and payment through [www.testcovid.be](http://www.testcovid.be) you will receive an e-ticket with a QR-code. You need to show this together with your identity card in the testing village. The test with a nose swipe takes a few minutes.

**Q: As a company, can I get my employees with high-risk contacts tested?**

Soon ten companies in Antwerp will be able to get employees with high-risk contacts tested in the testing village. For the time being, this is a small-scale pilot project.

- The idea is not to preventively screen all employees for COVID-19. The company doctor must confirm that the employee(s) in question meet the Sciensano test criteria.
- The company doctor will then receive a unique code for each employee to make an appointment in the testing village. The tests are paid for by the employers.

It will be evaluated later whether there will be an extension to other companies.

Testing employees with high-risk contacts can shorten their quarantine by four to five days.

**Q: When do I get my test results?**

After taking the test you will receive the results within 24 to 48 hours via your GP, [www.cozo.be](http://www.cozo.be) or [www.mijngezondheid.be](http://www.mijngezondheid.be). Most results are issued within 36 hours. If
you need a certificate to leave for a foreign country, you can print out your negative result via the same websites.

**Q: What is the difference between quarantine and self-isolation?**

A: If you are requested to go into quarantine, this is for a period of 14 days. At that time there is only a suspicion that you are a virus carrier, not that you are (already) ill. For example, you had close contact with someone who tested positive or you were in an area with intense virus circulation (red zone) or in an orange zone, where you participated in risky activities such as family visits or nightlife.

If you are requested to go into isolation, this is for a period of at least 7 days. This happens when you are ill or have tested positive. From the moment the symptoms appear, you will not remain contagious for more than 7 days.

The extension will be assigned automatically. This applies to the temporary driver’s licenses, as well as to the code 95 (professional competence) and medical certificates.

A: Register with Zorgparking. You will receive a sticker that indicates that health care providers (doctors, nurses and other health personnel) can park in front of your driveway or garage door between 8 am and midnight. That way they save time when

**Q: Do I have to wear a face mask on my bike?**

**A:** This depends on the location and if you are exercising intensively. Advice from the World Health Organisation suggests that intensive exercise with face masks is a health risk. In addition, the place and the time are important: do you often cross other people who can pass the virus this way?

In short: if you are cycling to the baker’s in a busy neighbourhood, you have to wear a face mask. However, if you only train intensively with a race bike on a route without much traffic, it is not compulsory to wear a face mask. Do you pass through busy residential areas with many cyclists crossing your path during your training ride or do you ride with a group of cyclists (maximum 10 people allowed)? Then wearing a face mask is mandatory.
Always take a face mask with you, because it is mandatory to have one ready at all times.

A: Yes, you can continue to use public transport. If you use public transport, you must keep a sufficient distance from other travelers according to the applicable social distancing rules. De Lijn requests you to get in at the back and to stop using cash to pay.

Timetables may suffer changes. Therefore you should always check the websites of [De Lijn](https://www.delijn.be) and [NMBS](https://www.nmbs.be) before you leave.

The use of a face mask or an alternative protective equipment such as a scarf or a bandana covering the mouth and nose is mandatory on all public transport for users aged 12 years and older, as soon as you reach the station, platform or bus stop. You can find more information about this under the face masks section on this page.

The gradual phasing out will also inevitably lead to an increase in the use of public transport. To avoid crowds, it is recommended to:

- if possible, travel with your own means (on foot, scooter, bicycle, car, etc.), in order to give priority to those who need public transport the most;
- avoid rush hour.

Families and social bubbles are allowed in one car, as the distance regulation does not apply in this case.

A: Yes, you can bring bulk waste to the recycling park or have it picked up at home by appointment. More information can be found on [this web page](#).

A: Top up your pass preferably online via [sorteerpasopladen.antwerpen.be](#).

If this does not work you can also address your request at the temporary city counter Den Bell. [Always make an appointment for this](#).

If you do not top it up, you can continue to deposit the residual waste and PMD fractions and your balance will then go in the red. After that you will have to make additional payments to get a positive balance once again.

Ask your childcare which system it uses.
If your childcare facility will continue to apply the arrangements made during the corona crisis
In this case you do not have to pay absence days. In the case of income-related childcare, parents temporarily do not have to give respite days when they keep their child at home on reserved days. However, the childcare centre can reduce the total number of respite days to which you are entitled by 1/12th per month for the months of July and August.
